

Appl. No. 10/604,599  
Amdt. dated October 18, 2005  
Reply to Office action of August 23, 2005

## REMARKS

### In the claims

5        Claims 1 – 20 are cancelled.

      Claims 21 – 40 are pending in this response. Claims 21 and 31 are independent and amended to recite the features in the wherein clause for overcoming the rejections of the patentability. No new matter is entered.

10

      Concerning the patentability of the amended independent claim 21 with respect to the prior art of record (Lee -US 2003/0234795), the amended claim 21 includes a wherein clause reciting that **both of the input color and the output color are in a RGB format** including R, G, and B components respectively representing red, green, and blue colors.

15        Therefore, the claimed invention is for converting colors **from RGB format to RGB format**. As Lee discloses an apparatus and method for converting pixels from YUV format to RGB format, applicant asserts currently amended independent claim 21 should be allowable over Lee because YUV format is obviously different from RGB format to one of ordinary skill in the art. A similar argument applies to currently amended  
20        independent claim 31, and the dependent claims should be allowable for at least the same reasons. Consideration of pending claims 21-40 is respectfully requested.

25
